PACOCAST 28LI

PACOCAST 28LI combines the qualities of a Pyrophyllite/Andalusite mineral based composition with excellent gunning characteristics. Due to minimum rebound losses, normal material requirements for gunite applications have been cut by as much as 25 percent. The product can be gunned without pre-wetting. Its low iron content makes it ideal for higher temperatures and reducing atmospheres. Data shown are average results of tests following the guidelines set forth in ASTM C-903-70 "Preparing Refractory Concrete Specimens by Cold Gunning".
