PROGUN® LC 60G

ProGun LC 60G is a sixty percent alumina, mullite based, 3100°F, low-cement gun mix that offers excellent resistance to alkalies. This product is designed to give excellent gunnability, low porosity, minimum linear change, and high fired strengths. ProGun LC 60G withstands severe high temperature atmosphere reactions, and erosive corrosive environments. A water booster pump is recommended for proper installation.

Physical properties shown are average values of samples taken under controlled conditions ASTM test methods used where applicable.

Maximum Service Temperature: 3100°F (1700°C)

Porosity: 24% (typical)
