**PRODUCT DATA**

**QUIKLITE 3A-DS**

**Brand Name:** QUIKLITE 3A-DS is a dust suppressed, lightweight castable formulated for use in reducing atmospheres. This product can be installed by casting or conventional gunning methods. QUIKLITE 3A-DS features a reduced dust level and low iron oxide content. After the initial set, QUIKLITE 3A-DS can be initially heated without using the traditional ramp-and-hold heatup schedule. Use the recommended QUIKTURN heatup schedule for the initial heatup.

**Physical properties shown are average values of samples taken under controlled conditions**

ASTM test methods used where applicable

**Maximum Service Temperature:** 2500°F (1370°C)

**Typical Water Required for Mixing (by weight):**
- Casting: 36%
- Predampening for gunning: 8.3 to 10.4%
