

PRODUCT DATA

Brand Name: RESCOCAST 17AG

Description: RESCOCAST 17AG is a high temperature, high purity alumina conventional gunning mix with only trace amounts of silica and iron oxide. The high purity of this gunning mix makes it an ideal choice for reducing atmospheres containing hydrogen and/or carbon monoxide. This product should be installed using conventional gunning methods.

Physical properties shown are average values of samples taken under controlled conditions
ASTM test methods used where applicable

Maximum Service Temperature: 3400°F (1870°C)

Typical Water Required for Mixing (by weight) :

Predampening for Gunning 1.9 - 3.8%

Bulk Density (pcf)

After 1500°F (815°C)

168

Gunned Data

(2.69 g/cm³)

Cold Crushing Strength (psi)
